

ENVIRONMENTAL POLICY

We are committed to continual improvement in our environmental performance, to the prevention of harm to the environment and to the adoption of sustainable work practices.

ENVIRONMENTAL MANAGEMENT SYSTEM

We are committed to environmental progress and sustainability. We aim to achieve this by:

- Retaining ISO 14001 accreditation across our entire organisation.
- Maintaining a robust environmental management system, which focuses on exceeding regulatory standards and complying with environmental codes of practice, to continuously drive sustainable and efficient work.
- Recognising climate-related risks and opportunities in our supply chain, we integrate climate response into our strategic decisions.
- Monitoring performance against our action plan to reduce our carbon emissions and continual improvement of our reduce, reuse and recycling opportunities.
- Working collaboratively with our employees, subcontractors, stakeholders and suppliers.
- Minimise our impact on the natural environment by preventing pollution, reducing waste, and adopting a responsible approach to the use of natural resources.
- Integrate environmental considerations into the design, planning and delivery of our work to reduce risk and achieve better environmental and community outcomes.
- Engaging in external environmental audits to ensure continual improvement is achieved.
- Annually reviewing this policy and evaluating our objectives to ensure we minimise our impact on the environment.

COMMUNITY ENGAGEMENT

By partnering with Councils and community groups, we are committed to cleaning up and beautifying the areas we live, work and play in. We aim to achieve this by:

- Creating opportunities for employees to be involved and contribute to environmental initiatives to regenerate healthy new ecosystems, helping flora and fauna recover and thrive.
- Promoting a culture that fosters sustainable and environmental initiatives.
